**Optimising Haemophilia Care:
A Patient-Centred Approach**
All
- 14:45–15:00
**Discussion, Q&A
and meeting summary**
All

You are invited to join us for this engaging discussion as our expert Faculty consider innovations in non-factor therapies and the role that these treatments play in modern haemophilia care.

Our Faculty will:

- Outline remaining unmet needs across haemophilia indications
- Share data highlighting the efficacy and safety profiles of non-factor therapies from phase 3 studies
- Discuss the practicalities of treatment individualisation and shared decision-making in a growing therapeutic landscape

There will be opportunities to engage with the Faculty during a dynamic panel discussion. We look forward to welcoming you to Milan to uncover the potential of non-factor therapies in haemophilia!
