The symposium will also be available for virtual on-demand viewing

**Join our expert panel as they discuss the latest advances
in haemophilia A care relating to FVIII mimetics**

A live Q&A discussion will follow the presentations

Learning objectives:

- To explain the differences between FVIII mimetics in terms of their structural design
- To highlight the mechanisms of action of different FVIII mimetics, and review the early preclinical evidence of FVIII mimetics in development
- To describe the clinical evidence relating to the various FVIII mimetics currently approved or under clinical development

Our faculty includes:

Chair

Dr Cedric Hermans
Saint-Luc University Hospital,
Brussels, Belgium

Dr Davide Matino

McMaster University,
Hamilton, Canada

Dr Priyanka Raheja

The Royal London Hospital,
London, UK

This is a non-promotional learning activity sponsored by F. Hoffmann-La Roche Ltd, developed for healthcare professionals (HCPs) for informational purposes. This meeting is not intended for HCPs practising in the USA and includes scientific information about investigational compounds that are not approved or valid in any jurisdiction. Please refer to the Summary of Product Characteristics (SmPC) for prescribing information on www.hpra.ie for any approved medicines mentioned within this presentation.
